BETTER ROADS TO THE SOUTH

One of the paradoxes of road building is the neglect into which the southern route has fallen. This is the most direct line of travel play and the one first opened to the coast before the days of unitor vehieles duting as far back as the hallyon days when the old Barce Iona mine was exporting its ores by way of San Pedra. The infant copper camps of Southern Nevada also patronized this conte in shipping ores to Swanses. Wales, by sailing vessel going around the Horn and crossing the Atlantic where the precious metals from these mines were reduced and a mittanees made to the owners So sing but lightgrade could stand that tax and the fact that we thin mines in Nevada were alde to export and make money in so deing testifies to the reduces of the mineral deposits. But that is an other store. The reference is used merely to show the antiquity of the wagen rouds between this region and the southern coast and harden ragnes, tables and other to point out the fact that since the early days of proporting noth- 'home' conveniences and a coning has been done to bring the const and descri sections into closer commercial communication. It is consided that a state sparcely settled as Nevada cannot undertake the construction long and costly highways who h would be more generally usby non-residents and tourists that by the people paying taxes Northern Califronia is hostiren g itself a itle the idea of scenning th balk of the summer traffic and Southern California will be the loser unless a dose of demanute it administered to bring the own ers of resorts to the no-essity for preventing any diversion of travto the central or northern routes crossing the Sierras via Carso City or Truckee. The Bishop Chan ser of Commerce has taken time If action to oronse public sentingut and the resolutions of the hedy should be endorsed by Los Angeles, Pasadena, San Berman dina, Riverside and San Diego Lishap arges the State Highway Commission to revise its formation of districts so that Inva county would be placed in the seventh district instead of the sixth. The headquarters of the latter are at Presucand are faid out to covthe San Joaquin valley territory with which the system on this shape was not expected to convert. Layo and Mono counties have nothing in common with the San Josephin district with which they are not connected either by business or roads. On the other hand the two neighboring counties glans the Nevada border are close linked with the Los Angeles district. The local highway systeman extension of the Los Angeles district and the only connection with the state highway system is with the roads leading to southern center Fresno has no lut rest in Inya county reare wholly separate from its own. With the great demands of the San Joaquin counties for road letterments the Fresno adminis tration in the nature of thimps, is fully occupied without giving much attention to further development in a detached and remote section of the division Los Angel s. on the contrary, has a gentthe interest in improving the thor archives on this slope and it is ordered that the proposed transfer of jurisdiction would speed up Inyo highway work which has dragged most depressingly

COMMUNISM IN WASHINGTON

All the jeromaids that have your leveled against the admin tration of the Department of Labor in charge of the unmigratio bureau at Ellis Island Live been treated with lofty searn as the attacks of a political machine intent on making capital at any east against the administration However, it remains for a justice scheig in the United States court in the ultra conservative distriet of Boston to express the conviction that "it is clear that the povernment operates some parts of the Communist party of this county. Here is a direct charge growing out of investigation brought about by application for write of labeas corpus for aliens held under a deportation order and whose removal from this country was delayed through manifest collusion with the higher-ups holding office exercising authority conferred by the Wilson administration. The whole conspiracy will come out one of these days after Cougress gets through mopping up the war scandals and has re time to spare. It is probable that this will not be brought about this year for there are numerous other matters of equal im portance to be ventilated without launching into new enterprice but it does appear that there is an Augean stable of political treachery hat needs purging if the nation is to survive the insidious for from within that is operated in collusion with the Soviet government to which Ambassador Martens pays allegiance. Influence of the most potent character has protected the Bolsheviki who are fortening at the public crib but it is hoped that the pungent remark of Justice George Anderson of the Boston district will furnish the foundation for a probe that will not rest with exposure but will be pushed to the extent of convicting the American renegades of sedition.

If anybody spent aything getting the democratic nomination for president this year he would be swindled.

Probably Mr. Wilson thinks that if he can't get the first term as president of the world he is at least entitled to a third term as president of the United States.

Having elected president Wilson on the "be kept as out of war" platform, the democrats are undecided whether to run Herl-- t Horses this time on the slapes "The lept us out of food," : nominate Beyan on the "He kept us out of drink" slabboleth.

Scaaner John Sharp Williams again sixts he would rather be a dog and bay at the more than remain in the senate. Every fellow was say, in the pub for which Nature has best qualified him.

-0-Every one- in a while the imputions value upth as his hards and takes a fresh hold on the stuffed slub he has laid up for meon the democratic party at the approaching election.
